

Labelling device for boutique manufacturers

Issued by [Pyrotec](#)

8 Jul 2015

At Pyrotec PackMark, we have affordable labelling solutions to suit a wide variety of manufacturers, including SMMEs with small production runs.

To meet the needs of our clients with boutique businesses, we have designed and manufactured a new self-adhesive labelling device - the Hand Wooden Labeller (HWL). This is the most cost-effective labeller available for cylindrical glass and plastic containers.

No fuss labelling

The HWL is a manual machine engineered to take the grunt work out of the labelling process. As those of you who have labelled products by hand will know - making sure that all your labels are applied neatly, securely and in the right place can be an incredibly time consuming and frustrating exercise.

With the HWL from Pyrotec PackMark, labels are automatically placed in the correct position, giving your products a consistent, immaculate and professional appearance with very little effort. This low maintenance machine, which requires no batteries or electricity, is also very cost effective to use.

Is the HWL right for you?

The HWL can handle wine bottles from 187ml to 1.5l. It can also label various other items such as securitainers, tubes and containers up to 2l, depending on the application requirements. The maximum label roll diameter for the HWL is 200mm with a core diameter of 42mm.
