

Upping the Flint, Flame game in SA

The Refinery Johannesburg has acquired the latest versions of AutoDesk Discreet's new Flint and Flame technology (v9.5). Both systems have been fully operational since the beginning of September 2006 and are available for freelance hire. Says Colin Goldridge, senior engineer, The Refinery, "These two products are specifically designed for multi-format post production. With these two combined products we are able to maximise the quality and efficiency on any type of project."
